

On Hatcra AI

Small controlled study with 26 parents. Real parents with real sleep struggles. The AI handled first response; consultants stepped in for complex cases.

**Paired with
human expertise**

A woman with long dark hair, wearing a light-colored top, is shown from the chest up. She has a sad expression, with her eyes closed or looking down. The background is a plain wall with some greenery visible on the left and right sides.

From the bottom of my heart, I have
to tell you guys this program is golden.

PHASE 1: PROPOSE

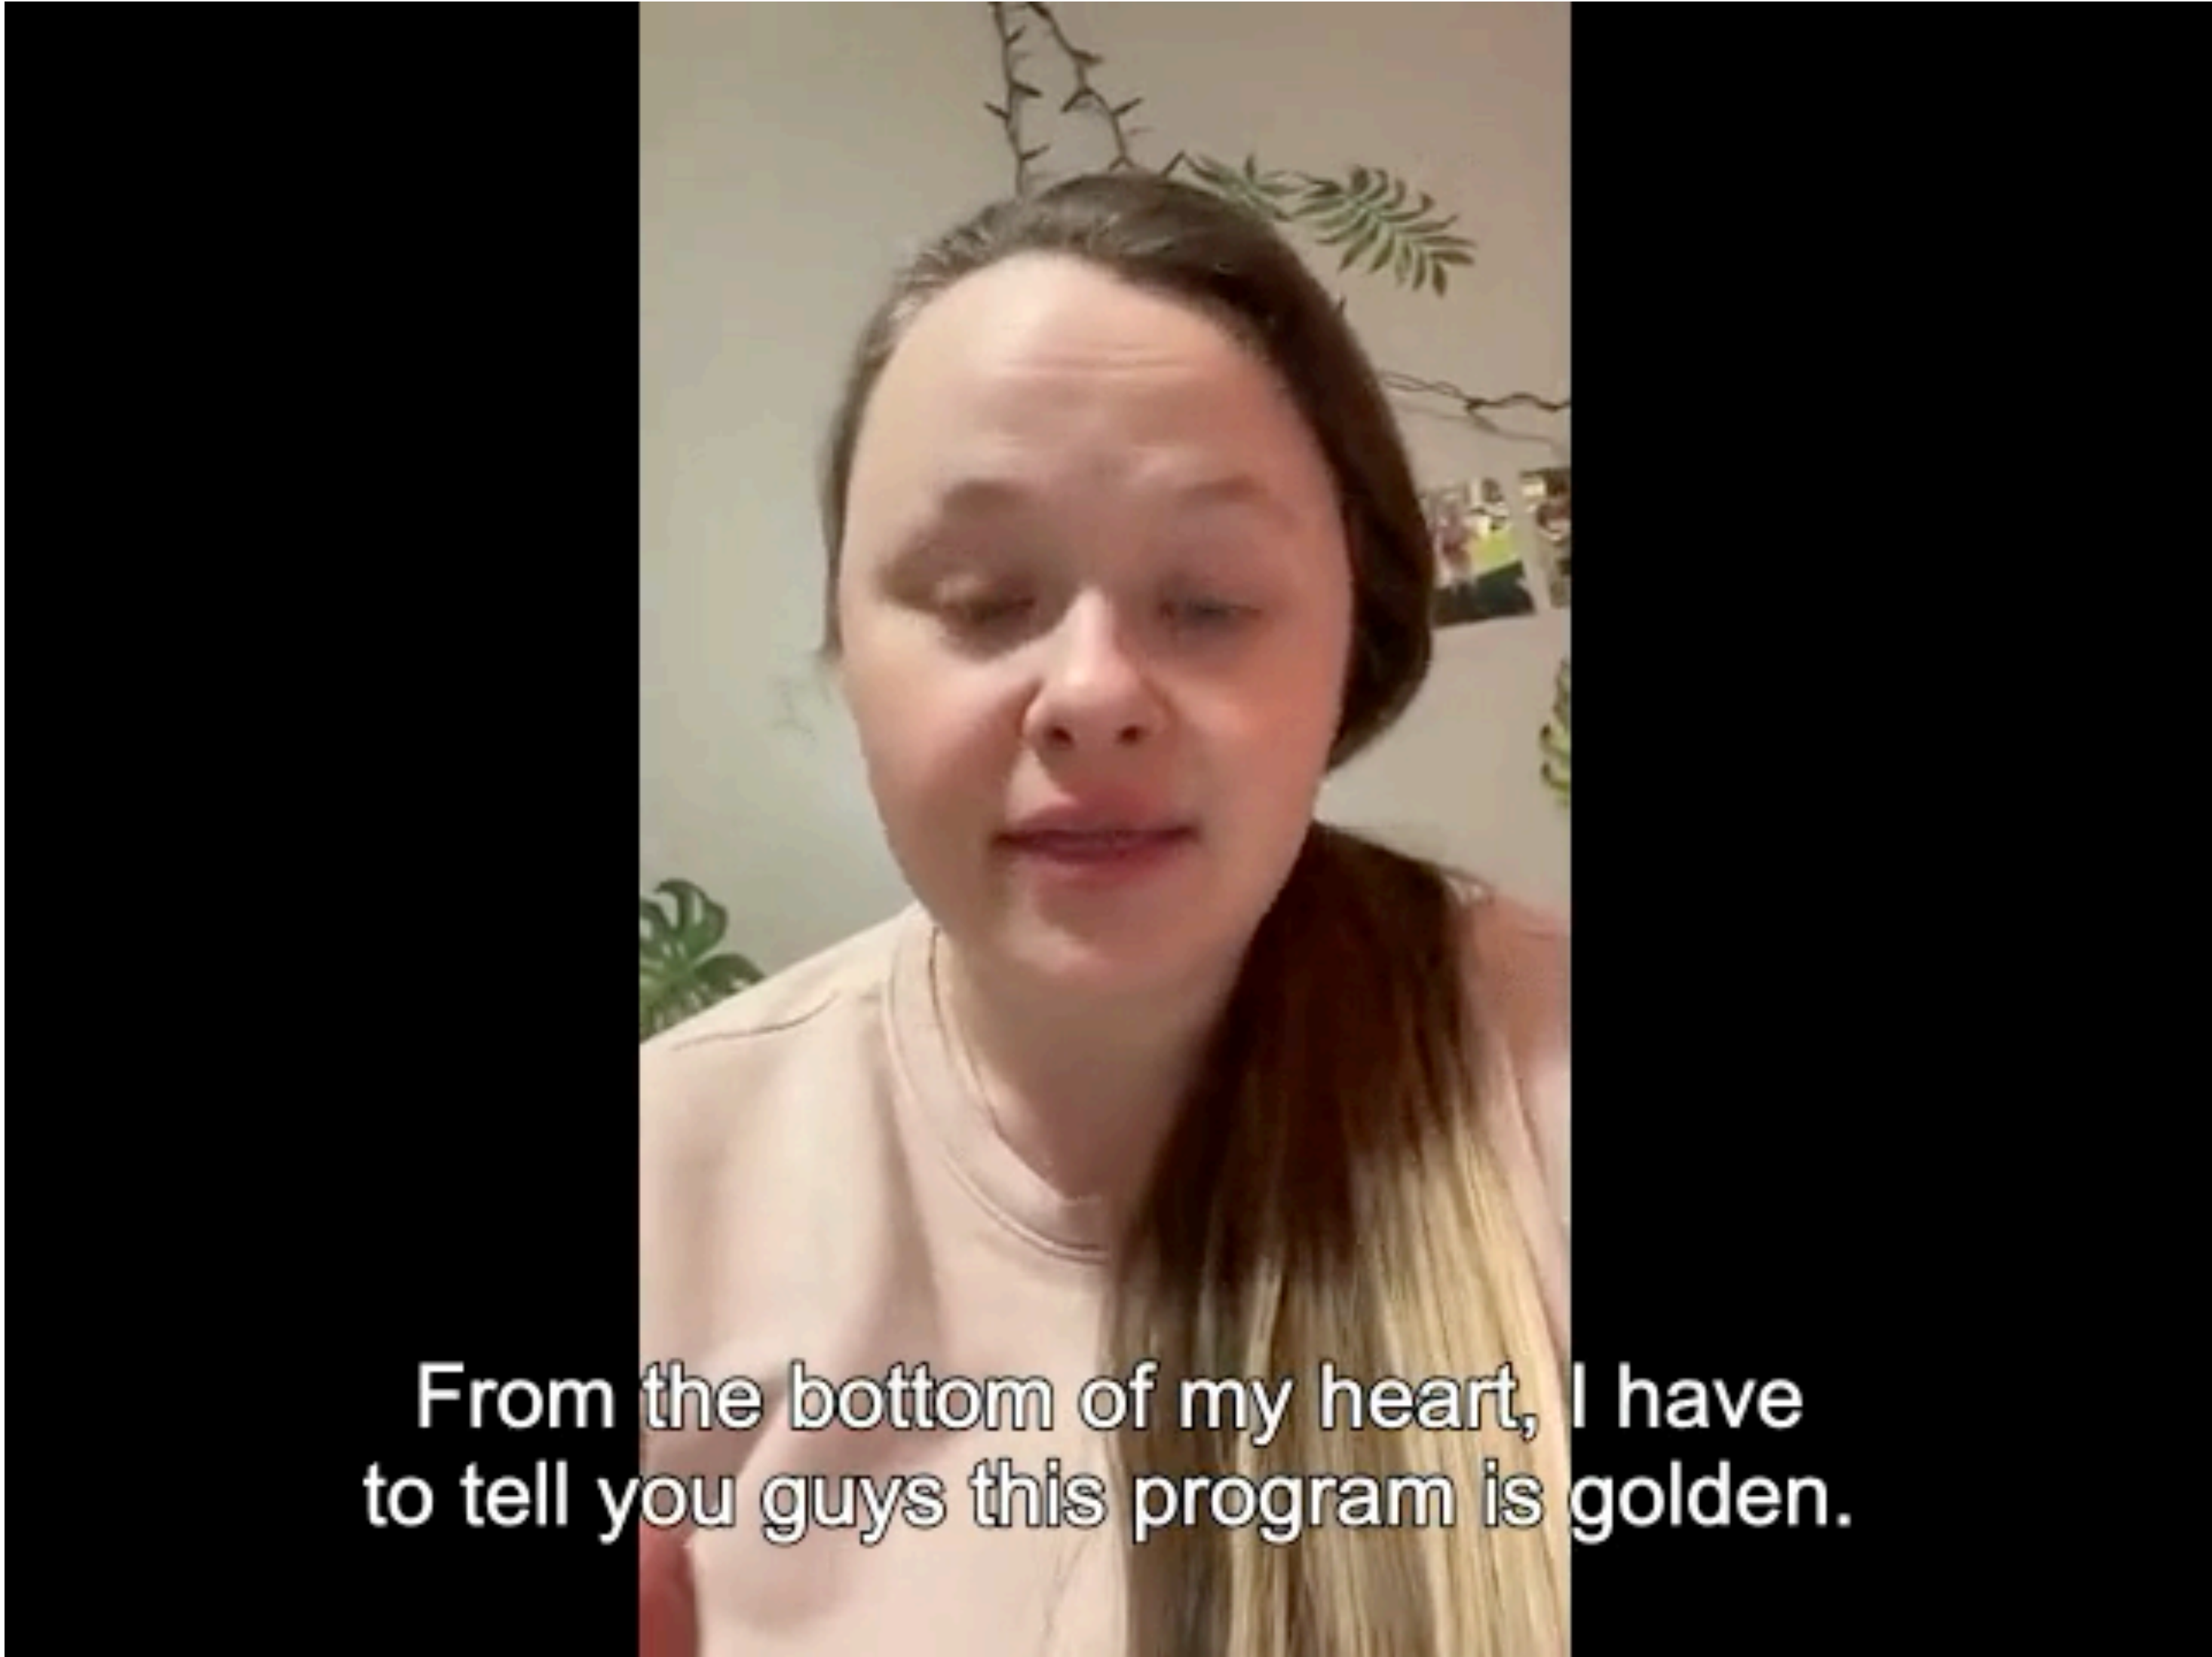

A woman with long dark hair and a light-colored top is shown from the chest up. She has a sad expression, with her eyes closed or looking down. The background is a plain wall with some greenery visible on the left and right sides.

From the bottom of my heart, I have
to tell you guys this program is golden.

PHASE 01: PROOF OF CONCEPT

Paired with human expertise

Small controlled study with 26 parents. Real parents with real sleep struggles. The AI handled first response; consultants stepped in for complex cases.

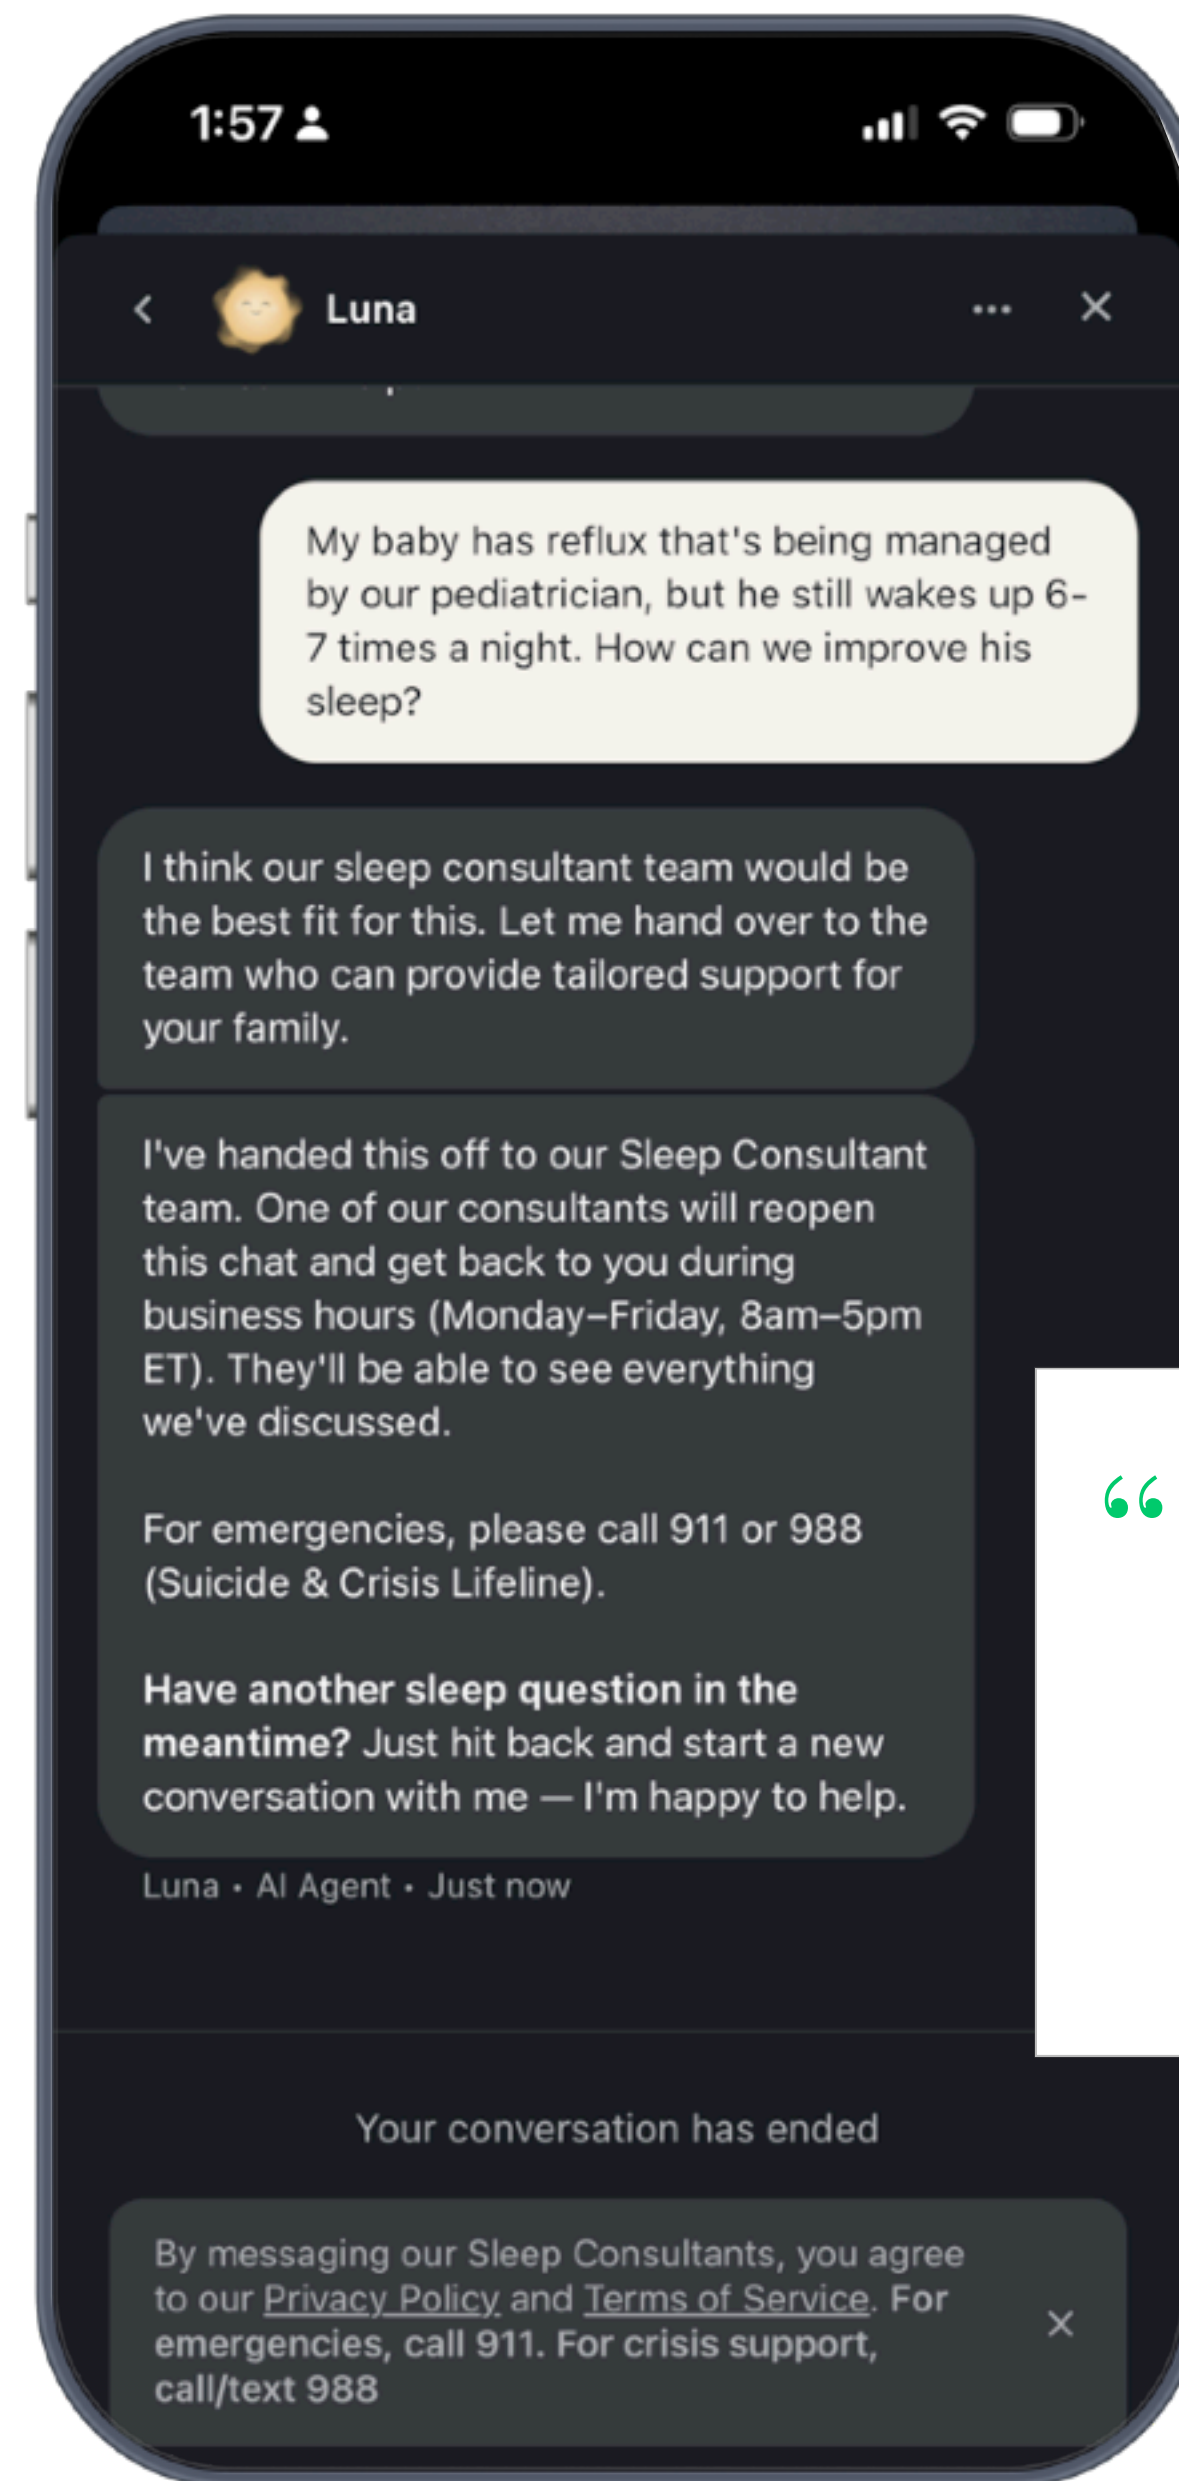

From the bottom of my heart, I have
to tell you guys this program is golden.

PHASE 02: 2 MONTH CLOSED BETA

100% satisfaction

Ran a closed beta, ran evals with sleep consultants, and fine-tuned against real conversations. At wrap up, participants stated that they were satisfied and trusted the information they received.

“I like this, as AI can provide a lot of common information, but sometimes an expert is needed to handle very unique cases.

FIRST TIME PARENT, 6 MONTH OLD
