LIVE SCREEN

A tool for building and tuning our app's color system. Pick a palette, edit or add tokens, and see it live across a real screen and full component gallery (buttons, inputs, banners, etc). Checks WCAG contrast as you go and exports ready-to-use CSS/JSON.

Palette Studio

A tool for building and tuning our app’s color system. Pick a palette, edit or add tokens, and see it live across a real screen and full component gallery (buttons, inputs, banners, etc). Checks WCAG contrast as you go and exports ready-to-use CSS/JSON.

Built using Claude Code

Personal Tools

Reno.

An app for planning and managing your own renovation. Save inspiration images, arrange them into moodboards to find your style, then work through a checklist of decisions in the order construction actually needs them.
