

## The itch

A self-initiated project by four designers who saw a gap in the emerging AR space.

We connect with each other through storytelling, but the stories being told with AR tools were:

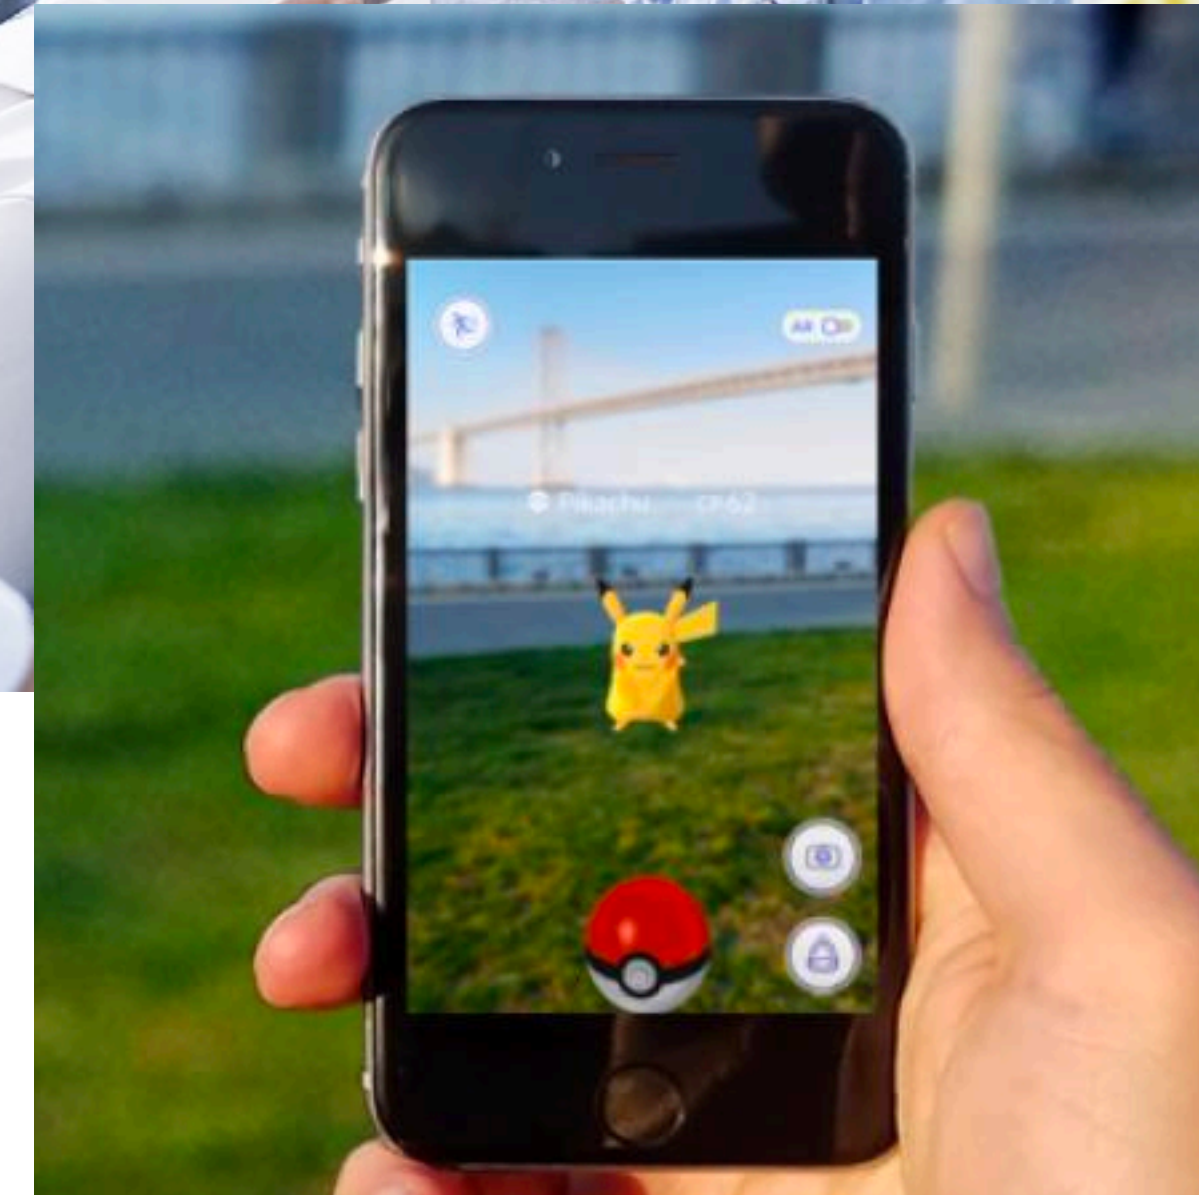

**Solitary experiences**

**Separated from the physical world**

**Experiences were hard to craft**

Traditional VR headsets

AR app (Pokemon Go)

## Design Challenge

HMW create shared digital experiences that enhance rather than replace our physical interactions with the world around us?
