

01 **Prototype fast**

02 **Build tools**

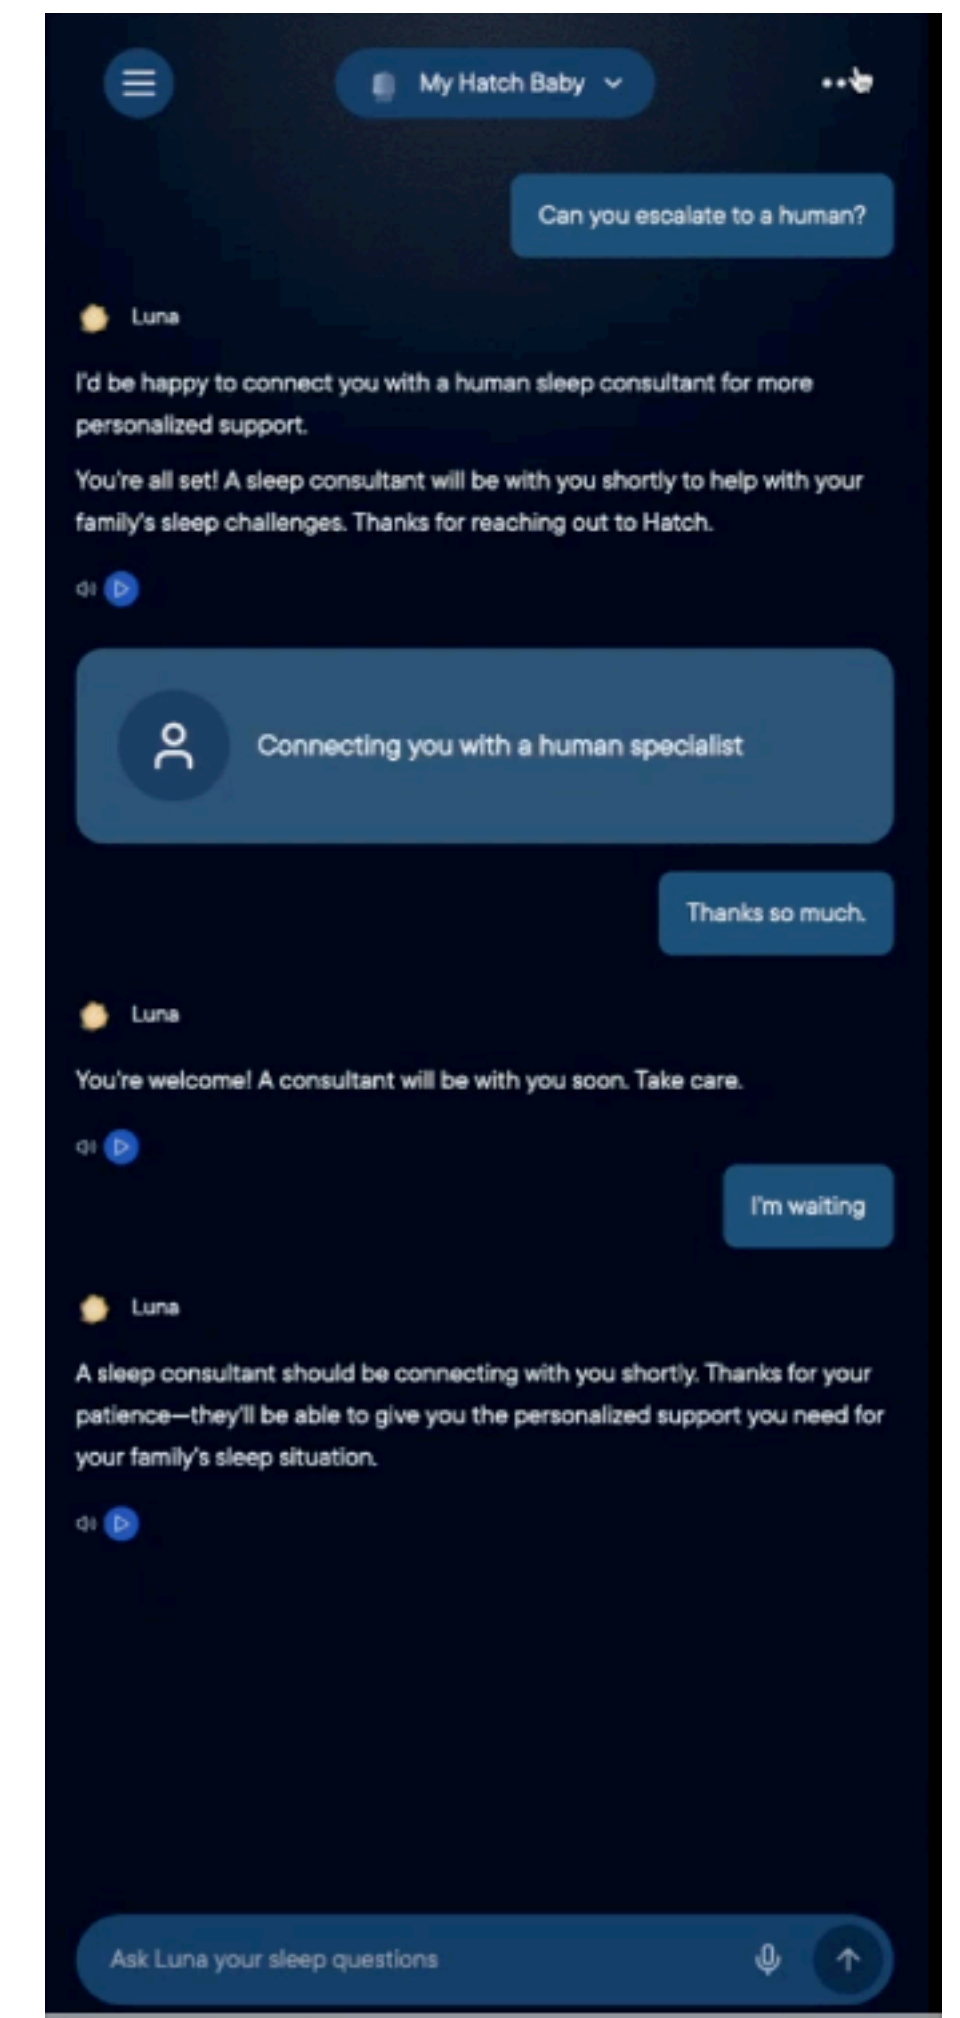

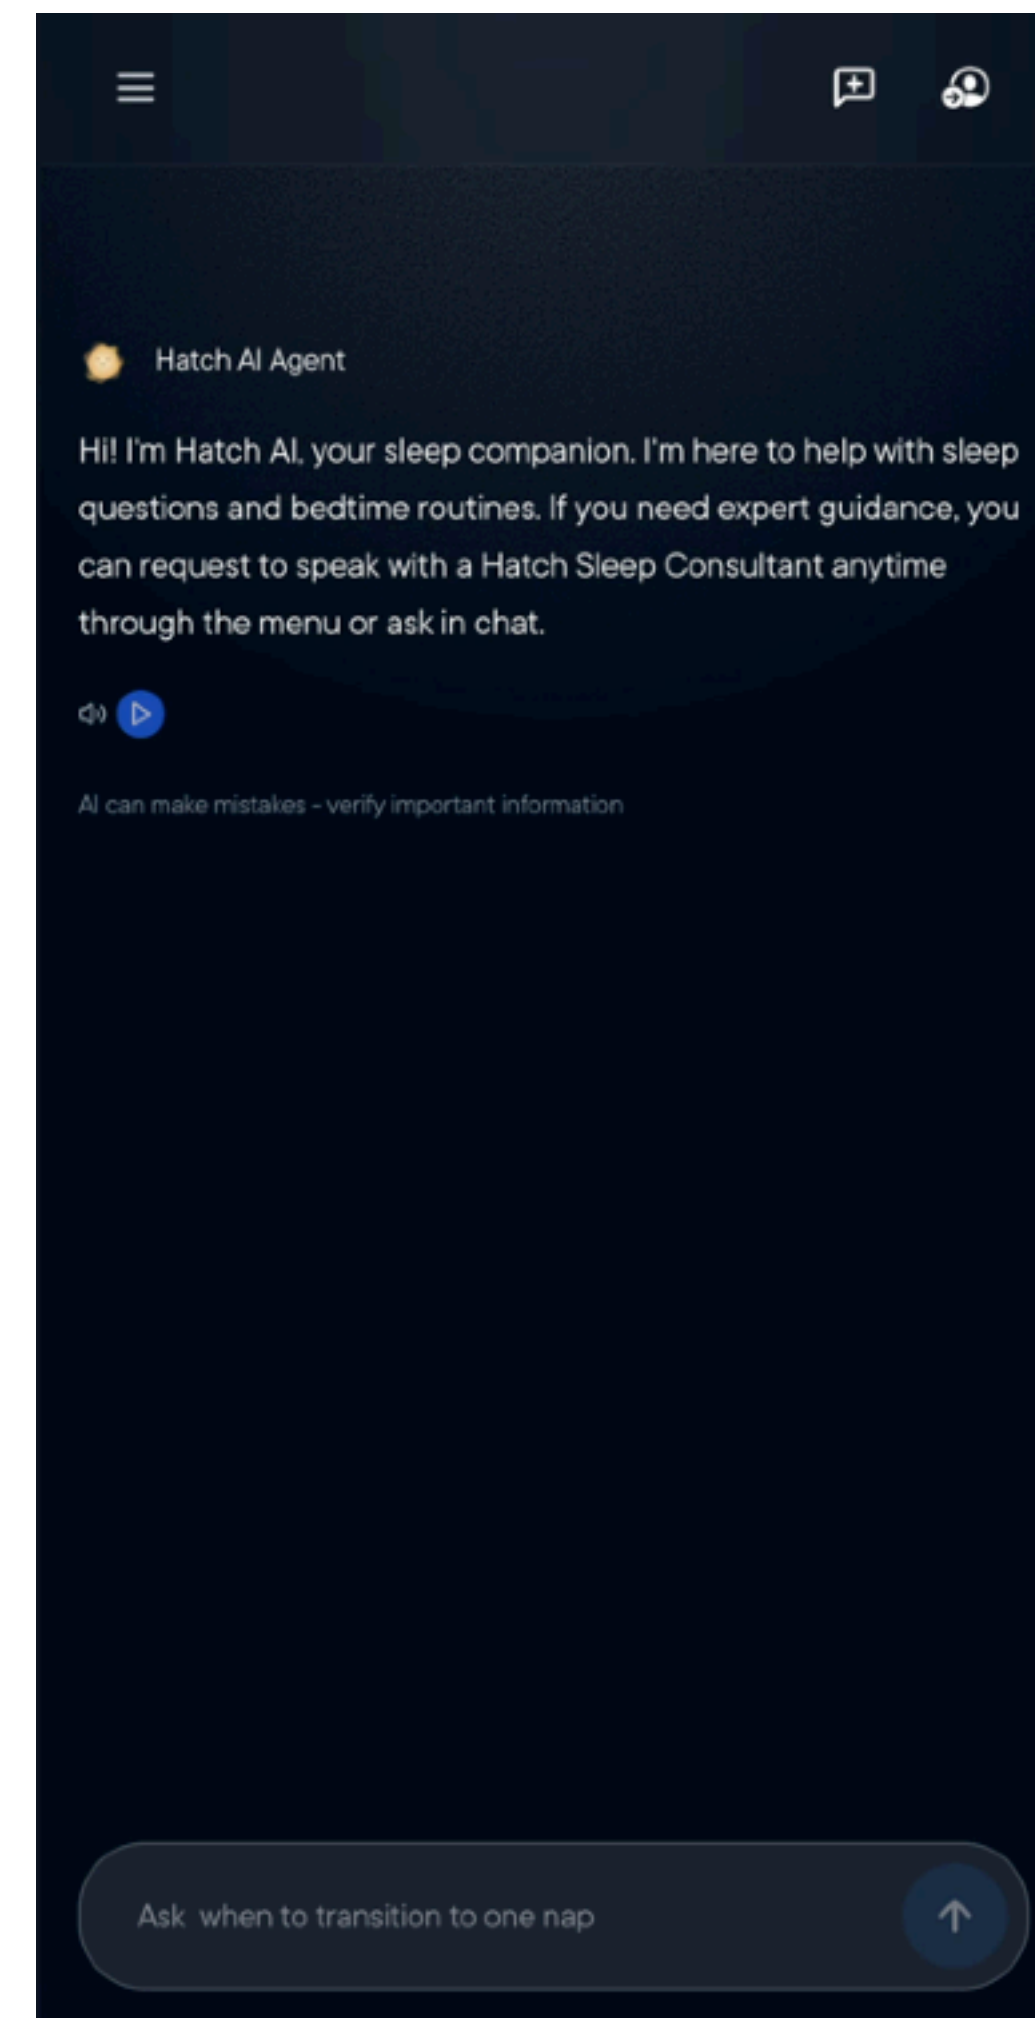

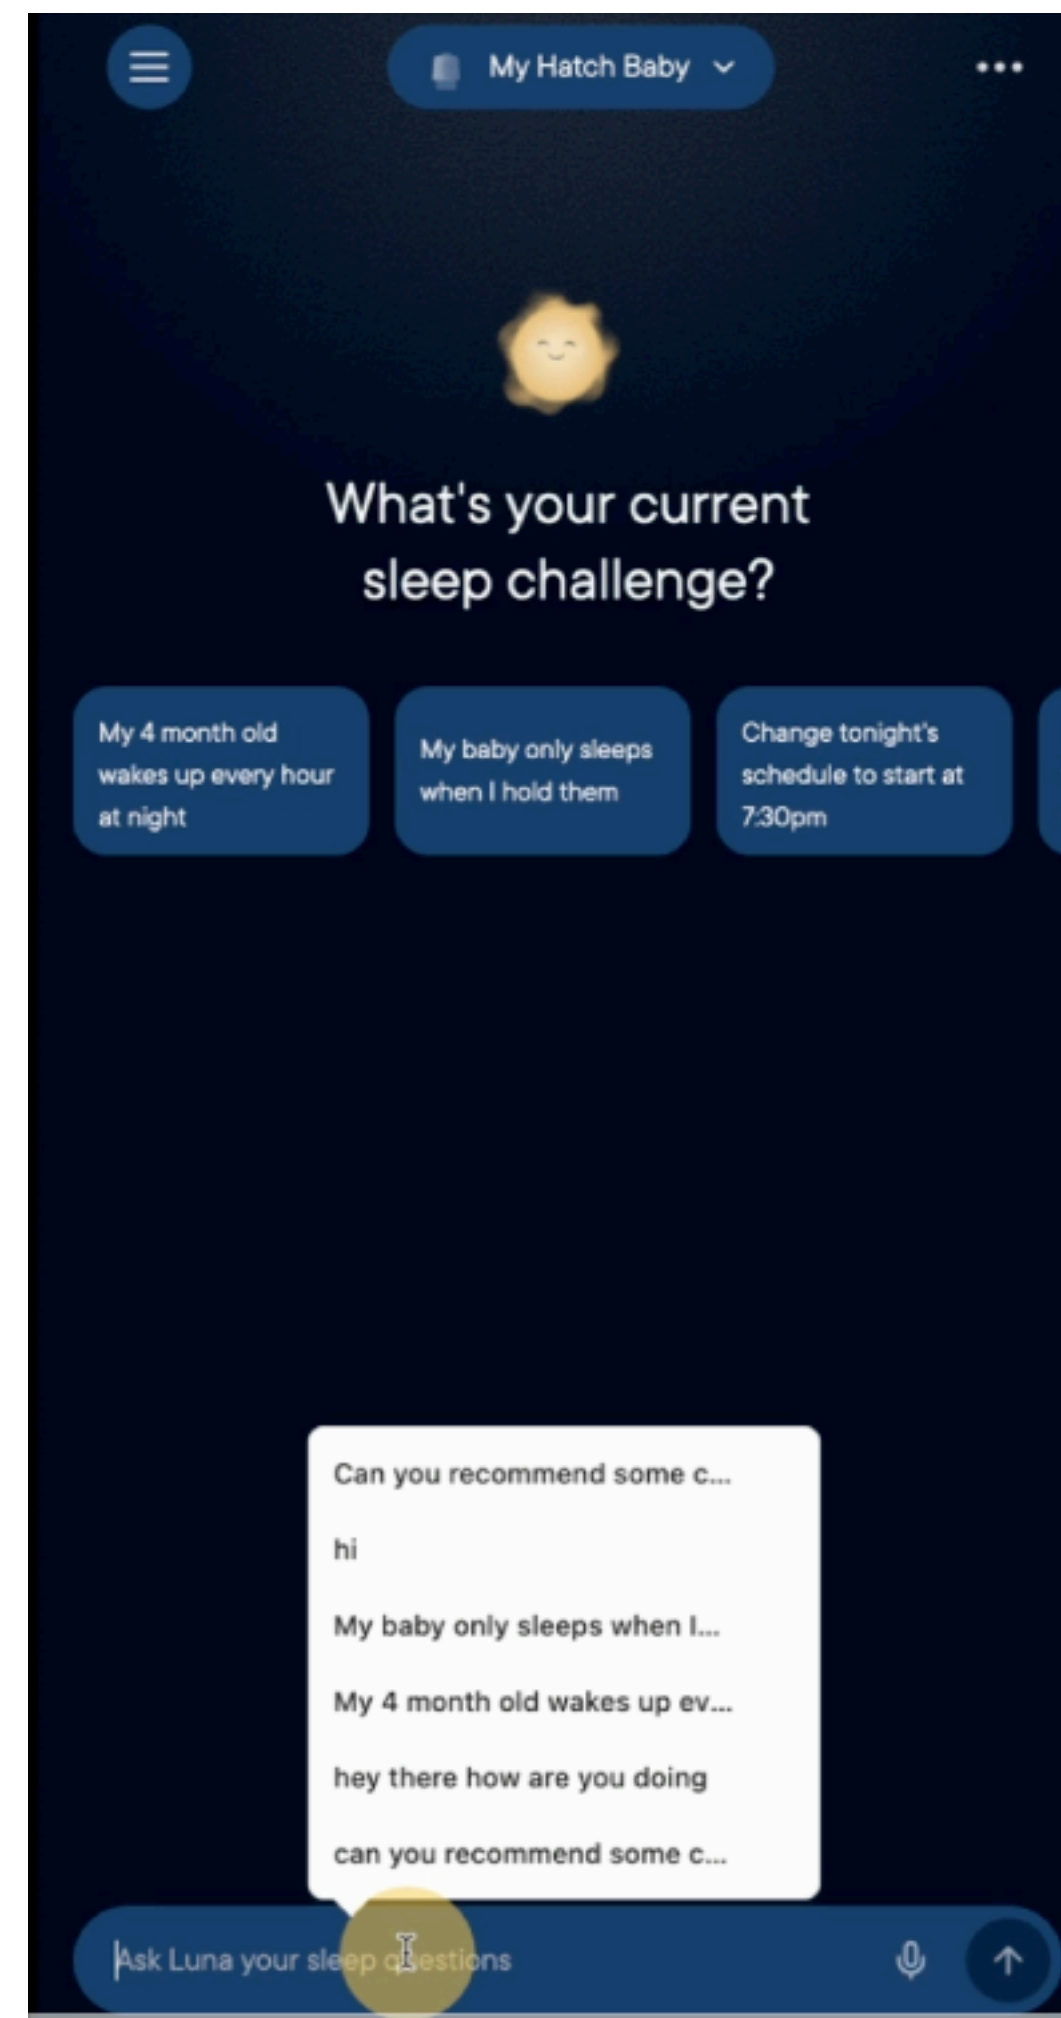

03 **Passive gains**

Rapid prototyping

Can AI be helpful for tired parents?

Prototyped several directions and ran studies to learn what AI support tired parents actually need. Landed on the desired UX, then shipped to 100% of users within 5 months.

Built in Figma Make and Claude Code

A few of the prototypes, each one getting us closer to the final UX
