

Research driven approach

Context Immersion

As we dove into the existing research from the hospital, we spoke with healthcare professionals that interacted with adolescents in varying capacities

“ These patients develop early because they interact mostly with adults which creates its own social problems as it makes it tough for them to socialize with peers.

Morten
Pediatrician,
Play and Activity for Youth in Hospitals

“ They have to be invited in. They often need something to meld them together. A lot of them like to be in isolation.
