

Storyboarding

Created storyboards showing how users would interact with the system in different situations —from successful interactions to edge cases and failure modes

STORYBOARDS

When it does something you don't want

STORYBOARDS

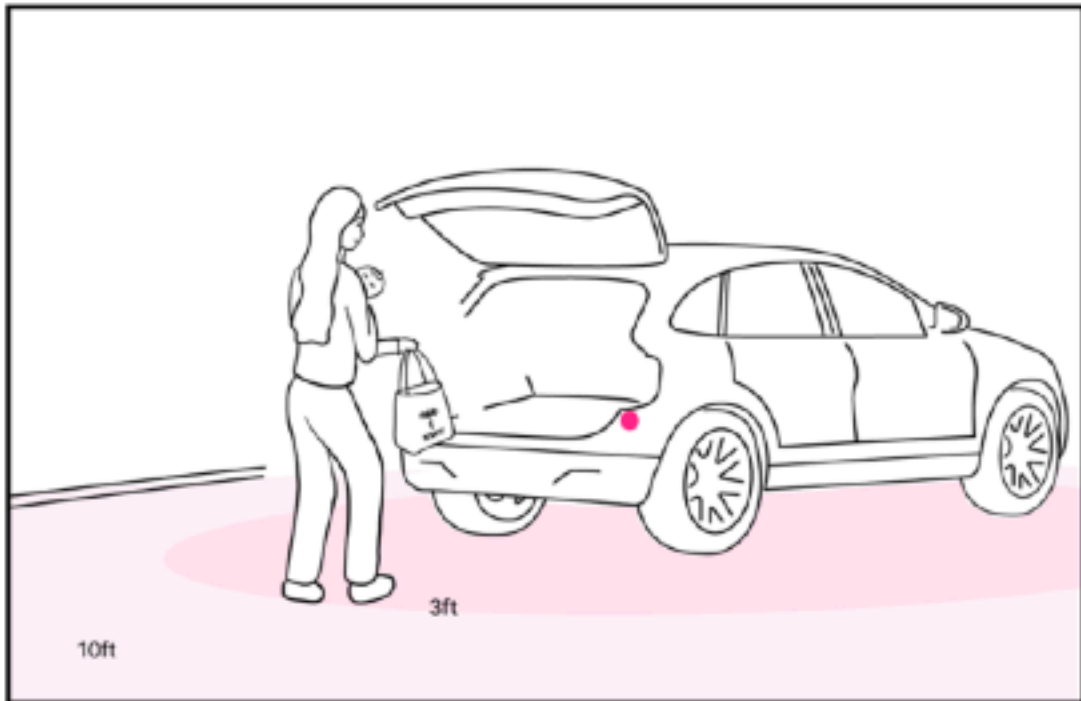

When the first attempt doesn't work

STORYBOARDS

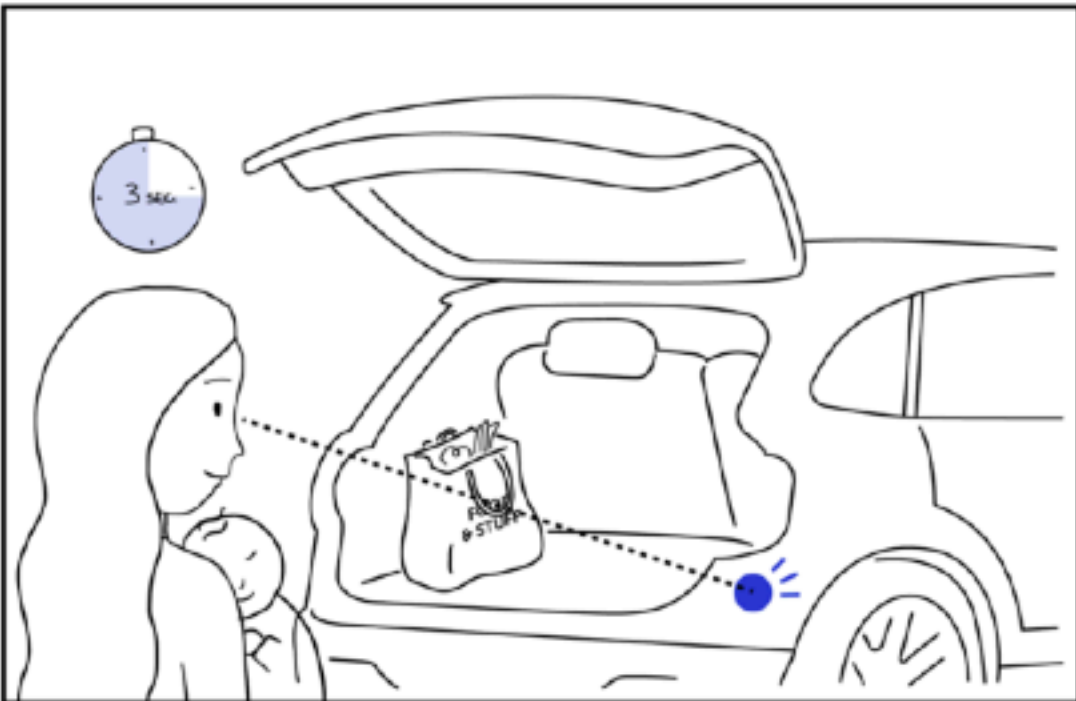

Approaching from odd angles

STORYBOARDS

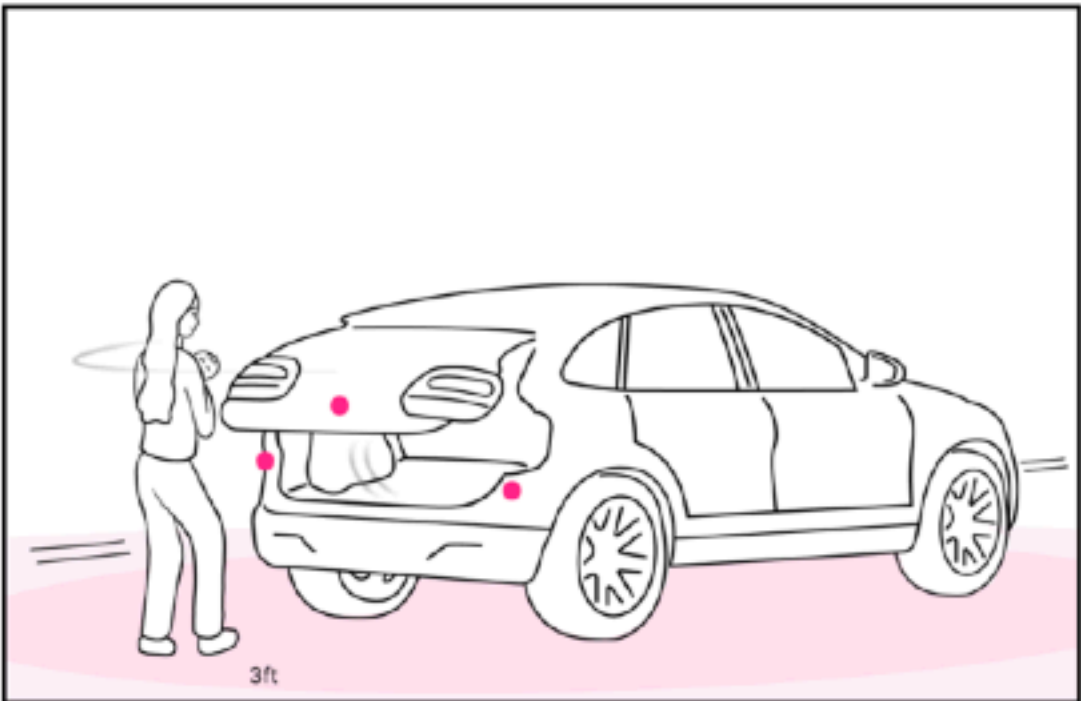

When everything works as planned

The trunk is open by the time she gets to the car. She loads the groceries

She turns her gaze near the tail lights again and holds her attention there for 3 seconds. The trunk begins to close.

She turns away as the trunk closes to place her baby in the car seat.

Co-creation Sessions

Working directly with Ford users to test and refine hands-free cargo access concepts. Collaborative sessions helped us understand real behaviors, preferences, and challenges in different scenarios.
