

HatchSleepClock-Ordering

Reservoir

The project was HSC's D0 onboarding flow: get users to a plan they'd follow that night, understand it helps them sleep rather than just tracks it, and trust their device would capture data by morning.

**Parents trusted the brand
completely — but only for
the device.**

Hatch Sleep Clock - Onboarding

The project was HSC's D0 onboarding flow: get users to a plan they'd follow that night, understand it helps them sleep rather than just tracks it, and trust their device would capture data by morning.

Hatch Sleep Clock - Library

The project was flattening the content library to surface more of it at once while designing it to feel varied and visually rich, with clear visual differentiation across content categories.
